

Research in Your Backyard Pharmaceutical Clinical Trials

Minneapolis-St. Paul, Minnesota

- Since 1999, 2,275 clinical trials have been conducted by biopharmaceutical companies in collaboration with local research institutions in the Minneapolis-St. Paul area, and some of them are still underway.
- Of the 2,275 clinical trials, 316 are still recruiting patients, giving some disease sufferers still looking for treatments that are best for them a viable alternative therapeutic option to consider and discuss with their physicians.
- The 316 clinical trials still recruiting patients are investigating treatments for: arthritis, cancer, cardiovascular disease, diabetes, gastrointestinal diseases, neurological disorders, infectious diseases, kidney and liver diseases, mental illnesses, respiratory disorders and many more.
